Motorist Advisory

Devil's Slide Tunnels Project – Construction Traffic Increase

A continuous pour for the second bridge footing is scheduled for Wednesday September 13. The following day, September 14, part of the first bridge support column will also be poured. Motorists using Highway 1 between Montara and Pacifica will notice an increase in construction traffic both days.

The footing pour will be similar to the one that occurred August 28. Flagmen will be stationed to control traffic and facilitate concrete trucks turning onto the temporary access road leading down to the work site at Shamrock Ranch. During the August 28 pour, only minor delays were experienced by north and south bound traffic.

The start of operations will be delayed until after 9:00 a.m. to avoid impacting morning commuters. However, motorists should expect slow moving and turning trucks from Pacifica to Shamrock Ranch throughout the day and late into the evening on September 13.

Please drive carefully in the area. Thank you for your patience.
